FOR HALF-CORD KINDLING WOOD delivered. LACY'S for cheapest cooking fuel; both phones.

THE COAL FIELDS OF OLD VIRGINIA

Review of Their Extent and Their Great Growth.

THE NEW GREAT SOUTHWEST

Thriving Towns With Populations Up in the Thousands Have Sprung Up as if by Magic—Electric Lights and Modern Improvements.

(Special Dispatch to The Times.)

MAYKING, KY., Aug. 23.—The Times correspondent has just returned from a trip through the coal regions of Wise county, Va., where operations are active, coke manufacturing being the principal industry. Beginning at Stonega, the far-famed boom mining town of the South, we see it situated on Callahan Creek two miles from the Kentucky border line. Mayking's nearest telegraph and railroad station bloomed into prominence two and a half years ago, and has since made a more rapid growth than any other mining town in Wise county. Here the Virginia Coal and Iron Company employs in the aggregate some 3,000 men, who turn out on an average of from 1,200 to 1,600 tons of as fine coke as can be found in the United States, besides an enormous supply of soft coal, daily. The Times correspondent understands that the working force at these mines will be increased on September 1st to 500 more hands. Less than five years ago a veritable forest of mammoth poplars grew where now is a city of upward of 5,000 souls. Here the wild bear and deer roamed unmolested less than three years ago, till Pennsylvania capitalists came, with push and enterprise, to the richly developed riches that underlie every hillside. Soon mines were opened, and the mammoth veins gave out such fine specimens of coal that in less than six months the Interstate Railroad had completed a branch line from its junction at Applegate, eight miles away. Five hundred coke ovens were completed, 600 miners' houses put up; streets were graded, a fine up-to-date commissary building was erected, and numerous other improvements were made. Stonega has every convenience of a metropolitan city, there being electric lights, a complete telephone system, water works, etc., and the mines are being run entirely by electricity. A year ago a wholesale department was added to the commissary, a fine business block added to the town, which has a fine trade in the surrounding country. Street cars are soon to be an addition and will run from the depot to the reservoir, park and ball grounds, two miles above the heart of the town. The recent smallpox scare in Stonega necessitated several changes in business, but things have now resumed their normal state, there being only three cases of the disease in the town.

MUD LICK.

Mud Lick Creek, two miles south of Stonega, bids fair to be almost an equal. Only a month ago capitalists from Pittsburgh, Pa., came here, organized the company of the Keystone Coal and Coke Company, and went to work, employing over 600 hands. The opening of mines, building miners' houses and coke ovens was soon in full blast. Soon 500 additional hands were put on the working force. Now five coke ovens are almost completed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in." Three hundred forty miners will be employed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in." Three hundred forty miners will be employed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in." Three hundred forty miners will be employed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in." Three hundred forty miners will be employed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in." Three hundred forty miners will be employed, and the new coke plant, a commissary building are completed, and a branch railroad, three miles long, is well under headway. The line will be completed by September 1st, when, it is announced, the coke ovens will be "fired in."
